ABSTRACT

This report is an INTERNSHIP report submitted in partial fulfillment of the requirements for the degree in civil engineering as per norms of VTU. The report consists of some of works in Integrated bus Terminal and different work carried out in the different sites and procedures used at the site construction. As per the calculations the process is carried in the field. The whole work we visited at the time of Basement and upper ground floor construction. So including the work of Excavation, Reinforcement, Shuttering, Dewatering process like these are the works we understand the things came in it. I put my best to elaborate the actual site conditions and problem faced at site and the strategy used to deal with them. The main objective in this report is to present the fundamental aspects of practical requirements. The sites in this report the objective was to introduce, wherever necessary material which embodies the most advanced and recent methodologies.
