**Decibles Lab Pvt LTD, Bangalore**

### Technical Talk on AWS & Cloud Computing

**Academic Year:** 2021-22

**Targeted Audience:** 2nd Year CSE & ISE

**Semester:** IV sem

**Name of the Event:** Technical Talk

**Date of Conduction:** 6<sup>th</sup> July 2022

**Time:** 10:30 AM to 12:30 PM

**Number of Participants:** 50

**Venue:** Seminar Hall- CSE

**Topic:** "AWS & Cloud Computing"

**Resource Person:** Mr. PRAMOD B N

**Designation:** Associate Engineer

Contractor Role

**2 Guinness World Records Holder | Multi Cloud Certified Architect**

**(1x AWS | 7x Azure | 5x Oracle | 4x Alibaba | 1x Juniper | 1x Aviatix | 1x Nutanix)**

**IEEE Brand Ambassador**

**AWS re/Start Accredited Instructor**

**AWS Certified Solution Architect – Associate**

**AWS Educate Student Ambassador**

**Microsoft Certified Trainer**

PRINCIPAL  
SIET., TUMAKURU.

## Objectives:

The objective of the Technical Talk was to give students a foundation on which to apply various computer science concepts including Cloud Computing. Amazon Web Service was to equip students with the skills they'd need to create a variety of items utilizing Amazon Services. In the creation of their projects, it encouraged collaboration and teamwork among the students.

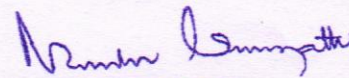

## Topics Covered:

- What Is Cloud computing?
- Need of Cloud computing.
- Uses of Cloud computing.
- Structure of Cloud computing.
- What is Amazon Web Services?
- Utilities of Amazon Web Services.
- Complete reference of Cloud and its Environment.
- Understand Cloud module by video clip and audio visual reference.
- How to Launch a Website on AWS
- Operating Systems of AWS- Amazon and Ubuntu Linux distributions, and Microsoft Windows Server.
- What is Server, Database & Network?
- What is the use of DNS in AWS?
- DevOps roles and responsibilities
- How does Jenkins integrate with GitHub Enterprise?

## Outcomes:

- Familiarity with general networking concepts
- Working knowledge of multi-tier architectures
- Familiarity with cloud computing concepts
- Working knowledge of distributed systems
- Get knowledge how to configure two servers and how to create private server and access it.
- Cloud Infrastructure and its Services.

## Activity Description:

  
PRINCIPAL  
SIET., TUMAKURU.

The Computer Science and Engineering department has organized Technical Talk on "Amazon Web Service and Cloud Computing" for 4<sup>th</sup> semester CSE & ISE students on 6<sup>th</sup> July 2022(Wednesday).

Our expert, Mr. Pramod B N has extreme knowledge of AWS and cloud computing and he is working as a Associate Engineer in IN 4.0 Group, United Kingdom as a Contractor Role. Mr. Pramod B N discussed Cloud computing is the distribution of computing services via the Internet (the cloud), including servers, storage, databases, networking, software, analytics, and intelligence, in order to provide faster innovation, more flexible resources, and economies of scale. You typically only pay for the cloud services you use, which helps you reduce operating expenses, improve infrastructure efficiency, and scale as your business grows.

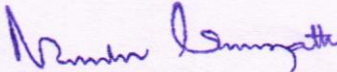

You are probably using cloud computing right now, even if you don't realize it. If you use an online service to send email, edit documents, watch movies or TV, listen to music, play games or store pictures and other files, it is likely that cloud computing is making it all possible behind the scenes. The first cloud computing services are barely a decade old, but already a variety of organizations from tiny start-ups to global corporations, government agencies to non-profits—are embracing the technology for all sorts of reasons.

AWS enables you to select the operating system, programming language, web application platform, database, and other services you need. AWS is designed to allow application providers, ISVs, and vendors to quickly and securely host your applications – whether an existing application or a new SaaS-based application. With AWS, you take advantage of a scalable, reliable, and secure global computing infrastructure, the virtual backbone of Amazon.com's multi-billion dollar online business that has been honed for over a decade. Using AWS tools, Auto Scaling, and Elastic Load Balancing, your application can scale up or down based on demand. Backed by Amazon's massive infrastructure, you have access to compute and storage resources when you need them. You pay only for the compute power, storage, and other resources you use, with no long-term contracts or up-front commitments. AWS utilizes an end-to-end approach to secure and harden our infrastructure, including physical, operational, and software measures. For more information, see the AWS Security Centre.

#### **Students Review:**

- Ashwini S: Great, well organized and informational session for starting AWS.
- Sadashish Kumar Bhokta : This is a very good course for a beginner. This course gives good motivation to kick off to a good start into AWS learning and good foundational knowledge to be comfortable with further studies on AWS.

#### **Feedback / Suggestions:**

  
PRINCIPAL  
SIET, TUMAKURU.

After the completion of the Technical Talk, participants said all topics have been very well presented, considering the variety of concepts involved. They expressed positively about the overall sessions and suggested to conduct practical sessions in future.
