CERTIFICATE

This is to certify that, the project entitled "Prediction accuracy improvement for bitcoin market price based on neural network approach" has been successfully carried out by GAGANA N [ISV18CS015], CHANDRASHEKARA T [ISV18CS008], MANORANJAN P M [ISV18CS025], KUSHAL KUMAR D [ISV18CS022], in partial fulfillment for the award of Bachelor of Engineering in Computer Science & Engineering of the Visvesvaraya Technological University, Belagavi during the academic year 2021-22. It is certified that all the corrections/suggestions indicated for internal assessments have been incorporated in the report. The project report has been approved as it certifies the academic requirements in respect of Project work-II prescribed for the Bachelor of Engineering Degree.

ABSTRACT

The relationship between the features of Bitcoin and the next day change in the price of Bitcoin using an Artificial Neural Network ensemble approach called Genetic Algorithm based Selective Neural Network Ensemble, constructed using Multi-Layered Perceptron as the base model for each of the neural network in the ensemble. To better understand the practicality and its effectiveness in realworld application, the ensemble was used to predict the next day direction of the price of Bitcoin given a set of approximately 200 features of the cryptocurrency over a span of 2 years. Over a span of 50 days, a trading strategy based on the ensemble was compared against a "previous day trend following" trading strategy through back-testing. The former trading strategy generated almost gives high accuracy.
