From,
Dr. Basavesha D,
Professor & HOD,
Department of Computer Science & Engineering,
Shridevi Institute of Engineering & Technology,
Tumkur.

To,
The Principal,
Shridevi Institute of Engineering & Technology,
Tumkur.

Respected Sir,

Sub: Requesting Permission to conduct 5-days FDP for Teaching staff-Reg.

      With subject to the above, we have planned to conduct **Five - days** Faculty Development Programme for Teaching staff on **"Research Methodology and Developing Research Skills"** on **26ᵗʰ Feb 2024 to 01ˢᵗ Mar 2024**. So we kindly request you to grant permission for the same.

Thanking you Sir

Yours faithfully
(Dr. Basavesha D)
HOD,
COMPUTER SCIENCE & ENGG.,
SIET, TUMAKURU-06.

Permitted.

28/2/24

CIRCULAR

Date: 23/02/2024

The Department of Computer Science and Engineering Organizing 5-Days FDP on **"Research Methodology Developing Research Skills"** for Teaching staff. Five members resource persons to present their valuable information on the topic on online mode. The FDP will be scheduled on **26/02/2024 to 01/03/2024**. The interested staffs register their names to the Department of Computer Science and Engineering Co-Ordinator.

**Programme
Co-Ordinator**

ABOUT FDP
Shridevi Institute of Engineering and Technology is organizing a 'Faculty Development Program on Research Methodology and Developing Research Skills' for the Faculties from 26 Feb 2024 to 01 Mar 2024. This program aims to foster an Learning methodology to maximize the facilitation of capacity building of the faculty members. The sessions are based on research methodology, in addition to lectures and discussion sessions with resource persons, the faculty members will be sharing specific research proposals drafted by them and solicit direct feedback on various aspects of their research activities. Theory of research methodology will be integrated into its practical implementation in all the sessions. The discussion on different teaching methods will be anchored through these model classes which will help the faculty members relate to the methodological nuances in a more meaningful manner.

Objective of FDP
The FDP aims at deliberation, sharing knowledge to the target audience about the significance of research skills and current opportunities with practical exposure to faculty members and research scholars of all the branches and allied areas.

Note
❖ Total number of registration of participants is limited to 100.
❖ Eligible participants are selected and intimated on First Come First Serve basis.
❖ Successfully completed participants will get FDP certificate (E -certificate).
❖ Overall, 80% of attendance to sessions is mandatory to get certificate.

Resource Persons
❖ Sessions will be handled by renowned experts from Academic and Industries

---

ABOUT THE INSTITUTION
Sri Shridevi Charitable Trust is the brainchild of Honarable Dr. M.R. Hulinaykar, Managing Trustee and Ex-MLC of Karnataka. He is the epitome of knowledge and has rendered service in various fields including Medical, Engineering, Pharmacy, Nursing and so on. Presently, under the umbrella of the trust there are more than 12 institutionfostering education to all sectors of people. Shridevi Institute of Engineering and Technology(SIET) is one among the different institutions under the SCT trust. SIET has completed its 2 decades of service in the engineering education stating from 2002 with an aim to provide quality technical education. It is one of the household names in this region with a good academic excellence.

.SIET is one of the affiliated institutions under Visvesvaraya Technological University offering 7 Under-Graduate, 4 Post-Graduate including management program and 4 Research Programs. Since its inception 17 batches of students have successfully obtained their degrees and have become the brand

Computer Science & Engineering

ABOUT THE DEPARTMENT OF CSE
❖ The Department of Computer Science and Engineering was established in Year 2002.
❖ The mission and vision of Department is to create brilliant individuals and also to develop the Institution into a centre of excellence with state-of-the-art infrastructure.
❖ Our Department aims to produce skilled professional in the domain of Information Technology and enable them to excel professionally.
❖ The Department boasts of well equipped and diversified laboratories with all the modern computing facilities at avail.
❖ The Department has an excellent placement track record.
❖ Value additions like Certification from NPTEL, SWAYAM, Infosys and International Certificates like IBM.
❖ Skill & Career Development Centre with Industry collaboration.

Research Methodology:
Research Design, Area of Study, Population of Study, Sample & Sampling Techniques, Instrumentation, Administration of Instruments, Methods of Data Analysis

Who can Attend ?
Faculties from all AICTE approved Institutions, Industry delegates & Research Scholars.

REGISTER FOR FREE

Last Date for online Registration: 24/02/2024

Whom to contact?

Online FDP – Report

DAY 01

Level: International

Title: INTRODUCTION OF RESEARCH METHODOLOGY AND ITS TOOLS

No. of Resource Persons: 01

Category: Faculty Development

Program Date: 26-02-2024

No. of Participants: 125

FDP Coordinator:

Dr. Dinesha H A Professor Dept. of CSE SIET, Tumkur	Dr. Kiran G M Associate Professor Dept. of CSE SIET, Tumkur	Dr. R Rajeswari Professor Dept. of CSE SIET, Tumkur

Resource Person: Dr. R. Mynavathi,
       Professor and Head
       Information Technology,
       Velalar College of Engineering and Technology,
       Thindal, Erode

Mode: ONLINE

Objective: Research methodology is the systematic process used by researchers to plan, conduct, and analyze research studies in order to answer specific questions or investigate phenomena of interest. It involves the following key components

1. **Research Design:** This is the overall plan or strategy for conducting a research study. It includes decisions about the type of study (e.g., experimental, correlational, qualitative), the research questions or hypotheses, the population/sample, data collection methods, and data analysis techniques.

2. Data Collection Methods: Researchers use various methods to collect data depending on the nature of the research and the research questions. Common data collection methods include surveys, interviews, experiments, observations, and archival research.

3. **Sampling Techniques:** Sampling involves selecting a subset of individuals or cases from a larger population. Different sampling techniques include random sampling, stratified sampling, convenience sampling, and purposive sampling.

4. Data Analysis: Once data is collected, it needs to be analyzed to draw conclusions and make inferences. Data analysis techniques vary depending on the research design and the type of data collected. Quantitative data may be analyzed using statistical methods, while qualitative data may be analyzed using thematic analysis, content analysis, or grounded theory, among others.

5. Research Ethics: Ethical considerations are important in research methodology to ensure the rights and well-being of participants are protected. Researchers must obtain informed consent from participants, maintain confidentiality, and avoid any form of harm or exploitation.

6. **Research Instruments**: These are tools or instruments used to collect data, such as surveys, questionnaires, interview guides, and observation protocols.

7. Validity and Reliability: Validity refers to the extent to which a research study measures what it claims to measure, while reliability refers to the consistency or repeatability of the findings. Ensuring validity and reliability is crucial for the credibility and trustworthiness of research results.

8. Data Interpretation and Reporting: Researchers interpret the findings of their study in the context of existing literature and theories. The results are typically reported in research papers or articles following a standard format, including an introduction, methods, results, discussion, and conclusion sections.

Overall, research methodology provides a structured approach for conducting rigorous and systematic investigations, ensuring that research findings are valid, reliable, and meaningful. It serves as the foundation for advancing knowledge and understanding in various fields of study.

DAY 02

Level: International

Title: RESEARCH DESIGN AND DATA REPRESENTATION METHODS

No. of Resource Persons: 01

Category: Faculty Development

Program Date: 27-02-2024

No. of Participants: 147

FDP Coordinator:

Dr. Dinesha H A Professor Dept. of CSE SIET, Tumkur	Dr. Kiran G M Associate Professor Dept. of CSE SIET, Tumkur	Dr. R Rajeswari Professor Dept. of CSE SIET, Tumkur

Resource Person: Dr. Santosh M Nejakar
          Professor and Head
          Dept. Electrical and Electronics Engineering,
          Jain Institute of Technology, Davangere

Mode: ONLINE

Objective: Research design refers to the overall strategy or plan that outlines how a research study will be conducted. It encompasses decisions about the research questions or hypotheses, the population/sample, data collection methods, and data analysis techniques. There are several types of research designs, each suited to different research questions and objectives

1. Experimental Design: In experimental research, the researcher manipulates one or more variables to observe the effect on another variable while controlling for other factors. This design allows for causal inferences to be drawn. Common experimental designs include pre-test/post-test designs, factorial designs, and randomized controlled trials (RCTs).

2. Correlational Design: Correlational research examines the relationship between two or more variables without manipulating them. It measures the degree and direction of association between variables using statistical techniques such as correlation coefficients. Correlational designs are used to identify patterns and associations but do not imply causation.

3. Descriptive Design: Descriptive research aims to describe the characteristics of a population or phenomenon. It does not involve manipulation or control of variables. Surveys, observational studies, and case studies are common descriptive research methods.

4. Qualitative Design: Qualitative research focuses on understanding the meaning and context of social phenomena through in-depth exploration and interpretation of textual or visual data. Qualitative designs include methods such as interviews, focus groups, ethnography, and content analysis.

5. Mixed-Methods Design: Mixed-methods research combines qualitative and quantitative approaches within a single study to gain a more comprehensive understanding of a research problem. This design involves collecting and analyzing both qualitative and quantitative data, integrating findings, and drawing inferences from multiple sources of evidence.

Data representation methods, on the other hand, refer to techniques used to visually or graphically present research findings. These methods help researchers communicate complex data in a clear and concise manner. Common data representation methods include:

1. Tables: Tables are used to present numerical data in a structured format, making it easy to compare values across categories or variables.

2. Charts and Graphs: Charts and graphs visually represent data, allowing for easy interpretation and comparison. Common types of charts and graphs include bar charts, line graphs, pie charts, scatter plots, and histograms.

3. Diagrams: Diagrams, such as flowcharts, conceptual frameworks, and process diagrams, illustrate relationships, sequences, or concepts within a research study.

4. Maps: Maps are used to spatially represent geographical data or distribution patterns. Geographic Information Systems (GIS) technology enables the creation and analysis of spatial data.

5. Infographics: Infographics combine text, images, and visual elements to convey complex information in a visually appealing and accessible format.

By selecting an appropriate research design and utilizing effective data representation methods, researchers can ensure that their studies are well-designed, rigorously conducted, and effectively communicated to the intended audience.

Online FDP – Report

DAY 03

Level: International

Title: DATA ANALYSIS USING STATISTICAL TOOLS

No. of Resource Persons: 01

Category: Faculty Development

Program Date: 28-02-2024

No. of Participants: 94

FDP Coordinator:

Dr. Dinesha H A Professor Dept. of CSE SIET, Tumkur	Dr. Kiran G M Associate Professor Dept. of CSE SIET, Tumkur	Dr. R Rajeswari Professor Dept. of CSE SIET, Tumkur

Resource Person: Dr. M. Bhuvanesh Kumar,
               Department of mechanical engineering
               Kongu Engineering College

Mode: ONLINE

Objective: Data analysis using statistical tools involves the application of statistical methods to analyze and interpret data in order to draw meaningful conclusions. Statistical tools help researchers summarize, explore, and infer patterns or relationships within the data. Here are some commonly used statistical tools for data analysis:

1. Descriptive Statistics: Descriptive statistics are used to summarize and describe the main features of a dataset. Common measures of central tendency include the mean, median, and mode, while measures of variability include the range, variance, and standard deviation. Descriptive statistics provide initial insights into the characteristics of the data.

2. Inferential Statistics: Inferential statistics are used to make inferences or predictions about a population based on a sample of data. These methods include hypothesis testing, confidence intervals, and regression analysis. Inferential statistics allow researchers to generalize findings from a sample to a larger population.

3. Hypothesis Testing: Hypothesis testing involves making statistical decisions about the likelihood of a hypothesis being true or false. The process typically involves comparing observed data with expected data under a specific hypothesis, using statistical tests such as t-tests, chi-square tests, ANOVA (analysis of variance), or z-tests.

4. Correlation Analysis: Correlation analysis examines the strength and direction of the relationship between two or more variables. Common correlation coefficients include Pearson's correlation coefficient (for linear relationships), Spearman's rank correlation coefficient (for ordinal data), and Kendall's tau (for non-parametric data).

5. Regression Analysis: Regression analysis is used to model the relationship between one or more independent variables and a dependent variable. It helps identify and quantify the extent to which changes in one variable are associated with changes in another variable. Linear regression, logistic regression, and polynomial regression are common types of regression analysis.

6. ANOVA (Analysis of Variance): ANOVA is used to compare the means of two or more groups to determine if there are statistically significant differences between them. It partitions the total variation in the data into between-group variation and within-group variation, allowing researchers to test hypotheses about group differences.

7. Time Series Analysis: Time series analysis is used to analyze data collected over time to identify trends, seasonal patterns, and other temporal dependencies. Methods include moving averages, exponential smoothing, autoregressive integrated moving average (ARIMA) models, and spectral analysis.

8. Cluster Analysis: Cluster analysis is a multivariate technique used to identify natural groupings or clusters within a dataset. It helps classify objects or observations into homogeneous groups based on their similarities or dissimilarities.

9. Factor Analysis: Factor analysis is used to identify underlying factors or dimensions that explain the patterns of correlation among a set of variables. It helps reduce the complexity of data by identifying common underlying constructs.

These statistical tools can be applied using various software packages such as R, Python (with libraries like NumPy, Pandas, and SciPy), SPSS, SAS, and Excel. The choice of statistical tool depends on the research questions, type of data, and specific analytical objectives of the study.

Online FDP – Report

DAY 04

Level: International

Title: IDENTIFICATION OF RESEARCH TOPICS AND BRAINSTORMING

No. of Resource Persons: 01

Category: Faculty Development

Program Date: 29-02-2024

No. of Participants: 94

FDP Coordinator:

Dr. Dinesha H A Professor Dept. of CSE SIET, Tumkur	Dr. Kiran G M Associate Professor Dept. of CSE SIET, Tumkur	Dr. R Rajeswari Professor Dept. of CSE SIET, Tumkur

Resource Person: Dr. Rajesh Sharma R
    Associate Professor
    Department of Computer Science and Engineering
    Alliance College of Engineering & Design, Alliance University
    Chandapura - Anekal Main Road, Anekal

Mode: ONLINE

Objective: Identification of research topics and brainstorming are crucial steps in the research process, as they lay the foundation for a successful study. Here's a step-by-step guide on how to identify research topics and brainstorm ideas:

1. Identify Your Interests: Start by reflecting on your interests, passions, and areas of expertise. Consider what topics you find intriguing and what questions you'd like to explore further. Your enthusiasm for a subject will drive your motivation throughout the research process.

2. Review Existing Literature: Conduct a thorough review of existing literature in your field of interest. Identify gaps, controversies, or unanswered questions in the literature that could serve as potential research topics. Pay attention to recent developments and emerging trends in the field.

3. Consider Practical Relevance: Think about the practical relevance and significance of potential research topics. Consider how your research could contribute to addressing real-world problems, informing policy or practice, or advancing theoretical understanding in your field.

4. Narrow down Your Focus: Once you have a broad list of potential research topics, narrow down your focus to specific research questions or areas of inquiry. Clarify the scope and objectives of your study to ensure it is feasible within the constraints of time, resources, and expertise.

5. Brainstorm Ideas: Engage in brainstorming sessions to generate ideas and refine your research topics. This can be done individually or in collaboration with peers, mentors, or colleagues. Use techniques such as mind mapping, free writing, or idea generation exercises to stimulate creativity and exploration.

6. Explore Different Perspectives: Consider different perspectives, approaches, or methodologies that could be used to address your research topic. Think about interdisciplinary connections or cross-cutting themes that could enrich your study and broaden its impact.

7. Seek Feedback: Share your research topics and ideas with peers, mentors, or advisors to solicit feedback and insights. They can provide valuable perspectives, identify potential strengths or weaknesses in your proposed topics, and offer suggestions for refinement.

8. Evaluate Feasibility: Evaluate the feasibility of your research topics in terms of access to data, availability of resources, ethical considerations, and practical constraints. Choose a topic that is both intellectually stimulating and achievable within the constraints of your research context.

9. Prioritize and Select: Finally, prioritize your research topics based on their significance, feasibility, and alignment with your interests and goals. Select the most promising topic that you are passionate about and that has the potential to make a meaningful contribution to knowledge in your field.

By following these steps and engaging in systematic brainstorming, you can identify research topics that are compelling, relevant, and feasible, setting the stage for a successful research project.

DAY 05

Level: International

Title: FORMULATION TECHNIQUE FOR R & D PROPOSAL

No. of Resource Persons: 01

Category: Faculty Development

Program Date: 01-03-2024

No. of Participants: 70

FDP Coordinator:

Dr. Dinesha H A Professor Dept. of CSE SIET, Tumkur	Dr. Kiran G M Associate Professor Dept. of CSE SIET, Tumkur	Dr. R Rajeswari Professor Dept. of CSE SIET, Tumkur

Resource Person: Dr. Shankar Subramaniam
         Professor
         Department of Mechatronics
         Kongu engineering college

Mode: ONLINE

Objective: Formulating a research and development (R&D) proposal requires careful planning, clear communication, and alignment with the objectives and priorities of the research organization or funding agency. Here are some key steps and techniques for formulating an effective R&D proposal:

1. Identify the Problem or Opportunity: Clearly articulate the problem or opportunity that your R&D proposal aims to address. Provide background information, context, and evidence to support the need for the proposed research.

2. Define Objectives and Research Questions: Clearly define the objectives and research questions that your proposal seeks to answer. Ensure that the objectives are specific, measurable, achievable, relevant, and time-bound (SMART).

3. Review Existing Literature: Conduct a comprehensive review of existing literature relevant to your research topic. Identify gaps, limitations, and opportunities for further investigation. Use this information to justify the need for your proposed research.

4. Formulate Hypotheses or Research Hypotheses: If applicable, formulate hypotheses or research hypotheses that you will test or explore in your study. These should be based on theoretical frameworks, empirical evidence, or logical reasoning.

5. Propose Methodology and Approach: Describe the methodology and approach you will use to conduct your research. This includes research design, data collection methods, data analysis techniques, and any tools or instruments you will use. Justify why these methods are appropriate for addressing your research questions.

6. Outline Work Plan and Timeline: Provide a detailed work plan and timeline outlining the specific tasks, milestones, and deliverables for the proposed research. Break down the project into manageable phases and allocate resources (e.g., personnel, equipment, budget) accordingly.

7. Highlight Expected Outcomes and Impact: Clearly articulate the expected outcomes and impact of your research. Describe how your findings will contribute to knowledge advancement, technological innovation, or societal benefits. Emphasize the potential value proposition and relevance of your proposed research.

8. Address Feasibility and Risks: Assess the feasibility of your research proposal in terms of technical, logistical, and resource requirements. Identify potential risks, challenges, and mitigation strategies. Demonstrate that you have considered contingencies and alternative approaches to address potential obstacles.

9. Provide Budget Justification: Prepare a detailed budget justification that outlines the anticipated costs associated with your research project. Justify each budget item in relation to the proposed activities and objectives. Be transparent and realistic about resource needs and expenditure.

10. Demonstrate Expertise and Capacity: Highlight your expertise, qualifications, and track record in the relevant field of research. Describe any collaborations, partnerships, or institutional support that enhances the capacity and credibility of your research team.

11. Conclude with a Summary and Call to Action: Conclude your R&D proposal with a concise summary of key points and a compelling call to action. Reinforce the significance and urgency of your research proposal and encourage stakeholders to support and invest in your project.

12. Revise and Refine: Review and revise your R&D proposal multiple times to ensure clarity, coherence, and persuasiveness. Seek feedback from colleagues, mentors, or peer reviewers to identify areas for improvement and refine your proposal accordingly.

By following these formulation techniques, you can develop a comprehensive and persuasive R&D proposal that effectively communicates the significance, feasibility, and potential impact of your research project.

A Report on One Day Workshop conducted on "Communication skills"
for SIET Non-Teaching Staff Members

Topic	"Communication Skills" for Non Teaching Staff members
Date	04th January 2024
Time	10 am onwards
Venue	Edu Sat Hall
Expert Speakers	1. Mr. Nagaraj C Professor, Dept. of CIVIL, SIET
Target Audience	Non Teaching Staff members, SIET, Tumkur.
Association with	IQAC, SIET, Tumkur

Key Takeaways of Expert Lecture:

The workshop was conducted by Mr. Nagaraj C a communication skills expert who has extensive experience in conducting similar workshops for various organizations. The sessions were interactive and included a mix of presentations, group discussions, and practical exercises. The workshop started with an introduction and ice-breaking session. The expert explained the importance of effective communication in the workplace and how it can lead to better relationships with colleagues and increased productivity.

He explained the advantages oral communication and its importance in day to day professional life. He gave a presentation on the different barriers to effective communication, including cultural and language barriers. The participants were then given a practical exercise on active listening, which helped them to understand the importance of listening in communication.

Mr. Nagaraj C gave a presentation on non-verbal communication and its impact on communication. The participants were given a practical exercise on body language, which helped them to understand how their body language can convey different messages.

Then he discussed different communication styles and how to adapt to different styles for effective communication. The participants were given a role-play exercise where they had to practice different communication styles.

Conclusion: The Communication Skills workshop was a great success, and the participants learned a lot about effective communication. The practical exercises helped the participants to apply the concepts they learned and develop their communication skills. The feedback from the participants was positive, and they appreciated the effort put in by the college to conduct such

a workshop. Overall, the workshop was a great learning experience for everyone who attended.
