ABSTRACT

In this world of growing technologies everything has been computerized. With large number of work opportunities the human workforce has increased. Thus there is a need of a system which can handle the data of such a large number of employees in an organization. This project simplifies the task of maintain records because of its user friendly nature.

The "EMPLOYEE MANAGEMENT SYSTEM" has been developed to override the problems prevailing in the practicing manual system. This software is supposed to eliminate and in some cases reduce the hardships faced by this existing system. Moreover this system is designed for the particular need of the company to carry out operations in a smooth and effective manner.

The application is reduced as much as possible to avoid errors while entering the data. It also provides error message while entering invalid data. No formal knowledge is needed for the user to use this system. Thus by this all it proves it is user-friendly.

The project will allow admin to add new employees after proper authentication. Admin can also add new departments. It stores the details of employees such as name, department, date of birth, address.
