ACKNOWLEDGEMENT

A great deal of time and lot of effort has gone into completing this project report and documenting it. The number of hours spent in getting through various books and other materials related to this topic chosen by us have reaffirmed its power and utility in doing this project.

Several special people have contributed significantly to this effort. First of all we are grateful to our institution **Shridevi Institute of Engineering And Technology**, which provides us an opportunity in fulfilling our most cherished desire of reaching the goal.

We acknowledge and express our sincere thanks to our beloved Principal **Dr. Narendra Vishwanath** for his many valuable suggestions and continuous encouragement and support in the academic endeavors.

Thanks to **Prof. Dr. Suhas G K**, Head of the Department of Information Science and Engineering for his guidance on how to approach an engineering problem and come up with a solution in an organized manner.

We wish to express our deep sense of gratitude to **Mr. Kiran G M**, Department of Information Science and Engineering for all the guidance and who still remains a constant driving force and motivated through innovative ideas with tireless support and advice during the course of project to examine and helpful suggestions offered, which has contributed immeasurably to the quality of the final report.

ABSTRACT

In this world of growing technologies everything has been computerized. With large number of work opportunities the human workforce has increased. Thus there is a need of a system which can handle the data of such a large number of employees in an organization. This project simplifies the task of maintain records because of its user friendly nature.

The "EMPLOYEE MANAGEMENT SYSTEM" has been developed to override the problems prevailing in the practicing manual system. This software is supposed to eliminate and in some cases reduce the hardships faced by this existing system. Moreover this system is designed for the particular need of the company to carry out operations in a smooth and effective manner.

The application is reduced as much as possible to avoid errors while entering the data. It also provides error message while entering invalid data. No formal knowledge is needed for the user to use this system. Thus by this all it proves it is user-friendly.

The project will allow admin to add new employees after proper authentication. Admin can also add new departments. It stores the details of employees such as name, department, date of birth, address.
