

Time: 90 minutes
Sub Code: 10EC74
Date: 20/11/17

SHRIDEVI INSTITUTE OF ENGINEERING AND TECHNOLOGY
(An ISO 9001-2008 Certified Institution)
DEPARTMENT OF ELECTRONICS AND COMMUNICATION
ACADEMIC YEAR 2017-18
III INTERNAL ASSESSMENT TEST
SUBJECT: Embedded System Design

Max Marks: 25
Semester: VII

Answer any 2 full questions choosing from Q NO. 2,3,4.

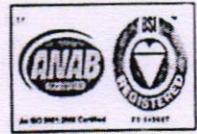

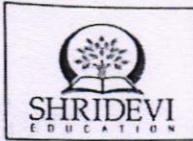

Q NO.1 is Compulsory

- | | |
|---|----|
| 1).a). What is a thread | 1M |
| 2). a). Briefly explain the common life cycle models of an embedded system with a suitable diagrams for each. | 6M |
| b). Discuss the system design specifications in an embedded systems with an example. | 6M |
| 3).a). With a suitable schematic and program ,explain the task control block. | 5M |
| b). Write a hardware architecture and data and counter flow diagram of a counter system and explain briefly flow diagram | 7M |
| 4). a). Write the algorithm for a simple OS kernel, using C language notation for 3 asynchronous tasks using TCB's only. The 3 tasks use a common data buffer for read, increment, and display operations . | 6M |
| b). Differentiate between:
(i) program and process;
(ii) processes and threads;
(iii) Lightweight and heavy weight threads | 6M |

III INTERNAL ASSESSMENT TEST SCHEME & SOLUTIONS

COURSE INSTRUCTOR:	Latha-k
DEPARTMENT:	Electronics & Communication
COURSE TITLE:	Embedded system design
COURSE CODE:	10EC74
SIGNATURE:	<i>[Signature]</i>

Q.NO.	SOLUTION	MARKS
1a.	The smallest of the resources necessary for the execution of the program is called thread	1M
2a.	Common life cycle models * Waterfall model * V cycle model * Spiral model * Rapid prototyping	1.5 x 4 = 6M
2b.	System design specifications → Example →	4M 2M
3a	Task Control Block Block diagram → and explanation Program →	3M 2M

 SIET., TUMAKURU

Q.NO.	SOLUTION	MARKS
3b.	Hardware architecture block diagram explanation	4M 3M
Aa	Algorithm for simple os kernel →	6M
b.	Differentiate between	
(i)	program and process	
(ii)	processes and threads	
(ii)	Lightweight and heavy weight threads →	6M
